The **2010 Proppant Market Report** tracks historical frac sand, ceramic proppant and resin coated proppant consumption through 2010. Data is collected and estimated from facilities operated by over 40 sand producing companies, over 20 ceramic manufacturers and 10 resin coaters representing over 100 individual production facilities worldwide. Predominantly focused on North American consumption, the report includes key industry metrics ranging from energy prices to drilling trends and select operator rankings.
